Career Objective

Aspiring Electrical and Electronics Engineer with a strong foundation in control systems, robotics, and embedded systems. Passionate about applying innovative solutions in automation, power electronics, and machine learning. Seeking an internship/job to leverage technical expertise and managerial experience in a dynamic work environment.

Education

Bachelor of Technology in Electrical and Electronics Engineering

[Your University Name], [Your City]

Expected Graduation: [Year]

Relevant Courses: Control Systems, Power Electronics, Machine Learning, Embedded Systems, Robotics, Power Systems

Technical Skills

- Programming: Python, C, MATLAB, Simulink
- Embedded Systems: Arduino, Raspberry Pi, ESP32
- Simulation Tools: MATLAB/Simulink, Proteus
- Machine Learning: TensorFlow, Scikit-Learn
- Hardware: Sensors, LiDAR, Power Electronics
- Software & Tools: AutoCAD Electrical, PSCAD, PSpice

Projects

Self-Driving Car Prototype (Raspberry Pi + LiDAR)

Implemented object detection and autonomous navigation using Raspberry Pi and LiDAR. Developed a real-time obstacle avoidance system.

Spam Email Detection (Machine Learning)

Built a spam classifier using Python and Scikit-Learn. Achieved high accuracy through feature extraction and model optimization.

Power Factor Measurement using Arduino

Designed a system to measure power factor in real time. Utilized current and voltage sensors for data acquisition.

Static Var Compensator Prototype

Developed a compensation system to improve power factor in a single-phase system. Implemented a fixed capacitor-based approach.

Leadership & Managerial Experience

- Class Representative (CR) (4 Years) – Led and coordinated communication between students and faculty, managing academic and administrative concerns.
- Coordinator, EEPEX (Annual Technical Event) – Organized and managed technical events, guest lectures, and project exhibitions.
- Team Lead for Robotics Club/Technical Society – Supervised project teams and mentored junior students.

Certifications

- Machine Learning Fundamentals (Coursera/Udemy)
- Embedded Systems and IoT Certification
- MATLAB/Simulink for Control Systems

Languages

- English (Fluent)
- [Your Native Language] (Proficient)
